

## U.S. CMS Project Progress- 4<sup>th</sup> Quarter FY02

**Above- Several of the first twenty complete U.S. CMS Cathode Strip Chambers (CSCs) successfully received at CERN from the University of Florida and University of California, Los Angeles. Chambers are shown still in shipping crates, designed to house chambers with gas connected during testing and storage in the former ISR tunnel at CERN.**

**Right- A CSC chamber after final assembly and testing at University of Florida, being loaded for shipment to CERN.**

## U.S. CMS Project Progress- 4<sup>th</sup> Quarter FY02

**Above- U.S. CMS produced Hadron Forward Calorimeter modules with electronics in the H2 test beam at CERN.**
